Index

Spring–Fall

1972

Abbot, Francis Ellingwood, 292
Abeles, Hans, protoplasm theory of, 343
Abiogenesis: John Tyndall on, 289–290; British reactions to, 289–303; J. S. Mill on, 290–291; German reactions to, 303–318
Acidity changes and oxygen affinity, 247–257
Acquired characters, inheritance of, 79–80
Adair, G. S., 232, 255; on hemoglobin, 206, 242–243, 245–247, 255; equation of, 246–247
Adanson, Michael, 3; *Familles des plantes*, 268
Adaptive radiation, 75–79
Agassiz, Louis, on extinction, 85–86
Ahrens, Felix, 337
Albert, R., 338
Allen, Garland E., 439
Ancestral Law of Heredity, 389, 493
Andry, Nicolas, on parasitic worm origins, 100
Anti-essentialism of Lamarck, 80
Aristotle, 6; *Parts of Animals*, 11, 355–356, 368, 371–372, 379–380, 383–386; *De anima*, 12; *Historia Animalium*, 355–356, 362, 367, 371–373, 383, 386. *See also* Heart, Aristotle on
Arrhenius, ionic dissociation theory of, 218
Ascending scale, 74–79

Baglavi, 100
Baker, Jeffrey J. W., and Garland E. Allen, *Hypothesis, Prediction, and Implication in Biology*, review, 439–440
Baldwin, James Mark, 322
Barcroft, Joseph, 223, 229, 234–235, 238, 241–242, 255; *The Respiratory Function of the Blood*, 231; oxygen dissociation curves of hemoglobin, 231–232
Bastian, Henry, 290, 295; *Evolution and the Origin of Life*, 293; *The Beginnings of Life*, 293–294; on spontaneous generation, 293–294
Bateson, William: *Materials for the Study of Variation*, 406; on discontinuous variation, 407, 410, 412
Bayliss, William, 234–235
Beddall, Barbara G., "Wallace, Darwin, and Edward Blyth: Further Notes on the Development of Evolution Theory," 153–158
Beginnings of Life, The, Henry Bastian, 293–294
Bernal, J. D., 178
Bernard, Claude, vitalism of, 167–168
Bert, Paul, on hemoglobin, 213
Bertrand, Gabriel, 240; on fermentation, 339
Bichât, vitalism of, 166–168
Biejerinck, Martinus, 334–335
Biology in the Nineteenth Century. Problems of Form, Function and Transformation, William Coleman, review, 441–442
Bio-medical Excursions. A Biologist's Probings Into Medicine, Paul A. Weiss, review, 443–444

Bloch, Marcus E., on parasitic worm origins, 98–99, 106–107
Blood, 205–257; L. J. Henderson on, 205; Humphrey Davy on, 211; Gustav Magnus on, 211–212; uptake and release of oxygen in, 211–215; Nathan Zuntz on, 215–216, 218, 227; carbon dioxide in, 215–219; Hermann Nasse on, 216–217; R. Von Limbeck on, 217; A. Gürber on, 217–218; F. Holmgren on, 219; B. Werigo on, 227–228
"Blood and Hemoglobin: The Evolution of Knowledge of Functional Adaptation in a Biochemical System," Part I, John T. Edsall, 205–257
Boerhaave, Herman, on parasitic worm origins, 104
Bohr, Christian, 234; on hemoglobin, 213, 247–249; on carbon dioxide in blood, 219–228
Bonnet, Charles, on parasitic worm origins, 105–106
Borek, Ernest, 443
Boyle, Robert, 15–22; *Origins of Forms and Qualities According to the Corpuscular Philosophy*, 15; *Sceptical Chymist*, 15
Bradley, Richard, 101
Bragg, W. H., 186
Bragg, W. L., 186
Branching evolution and adaptive radiation, 75–79
Bremser, Johann, on parasitic worm origins, 108–110
Brera, V. L., *A Treatise on Verminous Diseases*, 111
British reactions to abiogenesis, 289–303
Broad, C. D., mechanism of, 174
Bronn, Heinrich, on spontaneous generation, 305
Bruguière, J. G., 421, 423
Buchner, Eduard, discovery of cell-free fermentation, 327–353
Buchner, Hans, 328–329, 331–332
Büchner, Ludwig, 306; on spontaneous generation, 304
"Buffon and the Concept of Species," Paul L. Farber, 259–284
Buffon, C. L. de, 429–430; on parasitic worm origins, 104–105. *See also* Species, Buffon's concept of
Bulbosae, Ray's division of, 31
Burkhardt, Richard W., Jr., "The Inspiration of Lamarck's Belief in Evolution," 413–438
Burnham, John C., "Instinct Theory and the German Reaction to Weismannism." 321–326

Camis, M., 232
Carbon dioxide: in blood, 215–219; Christian Bohr on, 219–228; in hemoglobin molecule, 247–257
Carbonmonoxyhemoglobin, spectroscopy of, 209–211
Cardiac, *see* Heart
Carozii, A. V., 84
Carpenter, W. B., 133
Carpenter, William, on spontaneous generation, 301–302
"Cell as a Unit, The," Paul Weiss, 181
Cell-free fermentation, *see* Fermentation, cell-free
Cesalpino, Andrea, 10, 29; *De plantis*, 4–5, 13; on natural system, 11–15; Cesalpinean system, 13
Chambers, Robert: *Explanations: A Sequel to the Vestiges*, 127–151; *Vestiges of the Natural History of Creation*, 127–151
Chapman, H. G., 336
Chemistry of hemoglobin, 206–209
Child, Gilbert, 290, 293
"Chloride shift" of Hamburger, 217
Christiansen, Johanne, 248–250, 255
Cleland, John, 287–288
Cohn, 287
Coleman, William, *Biology in the Nineteenth Century. Problems of Form, Function and Transformation*, review, 441–442
Commoner, Barry, 177
Competitive exclusion, 88–89
Conant, J. B., on hemoglobin, 235
Continuity, 81–84
Cowan, Ruth Schwartz, "Francis Galton's Contribution to Genetics," 389–412
Crick, Francis, on vitalism, 176
Cuvier, Georges, 419–421

Dale, Sir Henry, on William Harvey, 193–194
Darwin, Charles: on the natural sys-

tem, 2–3; Darwin's principle, 89; on spontaneous generation, 297–299; on genetics, 393–394; on variations, 396–397; "provisional hypothesis of pangenesis," 398; on organizational analysis of heredity, 402; on inheritance, 409
Daudin, Henri, on Lamarck, 419, 434
Davy, Humphrey, on blood, 211
De anima, Aristotle, 12
de Candolle, Augustin Pyrame, 4, 7–8
de Chardin, Teilhard, 183
de Gols, G., on parasitic worm origins, 100–102
Degradation, 74–79
Delbrück, Max, 187, 333
De plantis, Andrea Cesalpino, 4–5, 13
Descartes and worm origins, 99
De Variis, John Ray, 47
De Vries, studies of hereditable mutations, 405–406, 410, 412
Dictionary of Scientific Biography, Charles Coulston Gillispie, review, 440–441
Diderot, D., definition of life, 164
Die Radiolarien, Ernst Haeckel, 292, 311
Dissociation curve, *see* Oxygen dissociation curve
Douglas, C. G., 248–250; 255; on hemoglobin, 240
Driesch, Hans, vitalism of, 170–172
Du Bois Reymond, Emil, 308–309
Duclaux, Emile, on zymase, 338–339
Dujardin, M. Felix, on spontaneous generation, 119–121
Dunn, L. C., on genetics, 409

Edsall, John T., "Blood and Hemoglobin: The Evolution of Knowledge of Functional Adaptation in a Biochemical System," Part I, 205–257
Ehrenberg, Christian, on spontaneous generation, 116–117
Emboîtement: theory of, 100–105; "double," 101
"Endurance of the Mechanism—Vitalism Controversy, The," Hilde Hein, 159–188
Environment: Lamarck on, 57–58; role of, 86–87
Enzyme vs. protoplasm, 341–349
Equation of G. S. Adair, 246–247
Essay Concerning Human Understanding, John Locke, 21, 26–27
Essay Towards a Real Character and a Philosophical Language, John Wilkins, 27–28
Evolution: evidence for, 61–63; causes of evolutionary change, 68–70; origin of evolutionary novelties, 72–74; branching evolution and adaptive radiation, 75–79; evolutionary continuity, 81–84; mosaic, 87–88; man's, 89–90; Lamarck's, 413–438
Evolution and the Origin of Life, Henry Bastian, 293
Evolutionism, Lamarck's, 59–61
Exclusion, competitive, 88–89
Explanations: A Sequel to the Vestiges, Robert Chambers, 127–151
Extinction, 84–86; Louis Agassiz on, 85–86

Fahreus, R., on hemoglobin, 244
Familles des plantes, Michael Adanson, 268
Farber, Paul L., "Buffon and the Concept of Species," 259–284
Farley, John: "The Spontaneous Generation Controversy (1700–1860): The Origin of Parasitic Worms," 95–125; "The Spontaneous Generation Controversy (1859–1880): British and German Reactions to the Problem of Abiogenesis," 285–319
Faujas, Barthélemy de Saint-Fond, on Lamarck, 419, 423–424
Fermentation, cell-free, 327–353; Gabriel Bertrand on, 339; Macfadyen's theory of, 343–344
First and Last Experiments in Muscle Mechanics, A. V. Hill, review, 442
Fischer, Alfred, 334–335
Fischer, Hugo, on zymase, 348–349
Fletcher, Walter, 236
"Francis Galton's Contribution to Genetics," Ruth Schwartz Cowan, 389–412
Frank, Robert G., Jr., essay review of *Harvey Redux*, 189–204
Fundamenta Medicinae, Friedrich Hoffmann, review, 442–443

Galton, Francis: *Natural Inheritance,* 389; Ancestral Law of Heredity, 389, 403
Gamgee, Arthur, 211
Gansser, E., on hemoglobin, 238
General Systems Theory, 184–186
Generation, *see* Spontaneous generation
Generelle Morphologie der Organismen, Ernst Haeckel, 292, 311, 313
Genetics: Galton's contribution to, 389–412; L. C. Dunn on, 409
German reaction to abiogenesis, 303–318
Gibbs, Willard, 255; thermodynamic treatise of, 243
Gillispie, Charles C., 69; on Lamarck, 416–417, *Dictionary of Scientific Biography,* review, 440–441
Goeze, Johann, on worm origins, 98–99
Gradualness, 81–82
Graham, Thomas, 288
Gray, Asa, 296
Great Chain of Being, The, A. O. Lovejoy, 80
Green, Joseph Reynolds, 350; on zymase, 333–334, 337
Groos, Karl, 325–326
Grove, William, 287
Gürber, A., on blood, 217–218

Haeckel, Ernst, 287, 292, 306, 311–314; *Die Radiolarien,* 292, 311; *Generelle Morphologie der Organismen,* 292, 311, 313; *Natürliche Schöpfungsgeschichte,* 292, 313; *Monographie der Moneren,* 313
Halberstadt, 228
Haldane, J. S., 228–231, 240, 248–251, 255–256; on oxygen dissociation curve, 235–236
Hall, Thomas S., *A Source Book in Animal Biology,* review, 439–440
Hamburger, H. J., 216–217; chloride shift of, 217
Harden, Arthur, 344–345
Hartridge, 256
Harvey Redux, essay review of, Robert G. Frank, Jr., 189–204
Harvey, William: Walter Pagel on, 189, 195–198, 199–201; Geoffrey Keynes on, 189, 201–204
Hasselbalch, K. A., on blood and hemoglobin, 219–228
Hastings, A. B., 254
Heart: modern anatomy vs. Aristotelian anatomy, 358–361; Leonard G. Wilson on, 375–376
Heart, Aristotle on, 355–358; T. E. Lones on, 357, 363, 366; T. J. Tracy on, 357, 374; A. Platt on, 357, 374, 379; T. H. Huxley on, 357, 375–377; anatomy vs. modern cardiac anatomy, 358–361; methods of investigation, 361–370; surface anatomy, 370–372; external anatomy, 370–372; internal anatomy, 372–380; William Ogle on, 375–377, 379–380; cardiac function, 381–388
Hein, Hilde, "The Endurance of the Mechanism—Vitalism Controversy," 159–188
Helmholtz, Hermann von, 286–287, 309–310; *Ueber die Erhaltung der Kraft,* 286
Hemoglobin, 205–257; L. J. Henderson on, 205, 207, 228, 231, 250–252, 256; G. S. Adair on, 206, 242–243, 245–247; early work on chemistry of, 206–209; Wilhelm Preyer on, 207; Z. Teichmann on, 207; O. Zinoffsky on, 208–209; A. Jaquet on, 208–209, 212; Felix Hoppe-Seyler on, 209; Gustav von Hüfner on, 209, 211–214, 222–224, 234, 238; George G. Stokes on, 209–210; spectroscopy of, 209–211; Paul Bert on, 213; R. A. Peters on, 213; Christian Bohr on, 213, 247–249; interactions in, 229–235; size of molecule, 229–235; oxygen dissociation curves of, 231–232; W. Manchot on, 234; Wolfgang Ostwald on, 234; J. B. Conant on, 235; N. D. Scott on, 235; A. V. Hill on, 235–236, 238–239, 241–242, 246–247, 255; true molecular weight of, 235–247; E. Gansser on, 238; H. E. Roaf on, 238; C. G. Douglas on, 240; T. Svedberg on, 243–245; R. Fahreus on, 244; J. B. Nichols on, 244–245; oxygen and carbon dioxide interactions in, 247–257; T. R. Parsons on, 251–252
Henderson, Lawrence J.: on blood

and hemoglobin, 205, 207, 228, 231, 250–252, 256; theory of buffer action, 233
Henry's Law, 211, 241
Heredity: Galton's Ancestral Law of, 389, 403; J. A. Thomson on, 406; Herbert Spencer on, 410; Charles Darwin on, 420. *See also* Inheritance
Heterogenesis, 285
Hill, A. V.: on blood and hemoglobin, 235–236, 238–239, 241–242, 246–247, 255; *First and Last Experiments in Muscle Mechanics*, review, 442
Histoire naturelle des animaux sans vertèbres, J. B. Lamarck, 417–418, 436
Historia Animalium, Aristotle, 355–356, 362, 367, 371–373, 383, 386
Historia plantarum, John Ray, 8
Hodge, M. J. S., "The Universal Gestation of Nature: Chambers' *Vestiges* and *Explanations*," 127–151
Hoffmann, Friedrich, *Fundamenta Medicinae*, review, 442–443
Hofmann, Caspar, 192
Hofmeister, Franz, 328; biochemical enzyme theory of metabolism, 346
Holmgren, F., 227, 249; on blood, 219
Hoppe-Seyler, Felix, 209
Hüfner, Gustav von, 209, 211–214, 222–224, 234, 238
Huxley, Thomas H.: on spontaneous generation, 288, 298–299; on Aristotle's views of the heart, 357, 375–377
Hypothesis, Prediction, and Implication in Biology, Jeffrey J. W. Baker and Garland E. Allen, review, 439–440

Inheritance: of acquired characters, 79–80; Herbert Spencer on, 399; Alexander Walker on, 401; Charles Darwin on, 409. *See also* Heredity
"Inspiration of Lamarck's Belief in Evolution, The," Richard W. Burkhardt, Jr., 413–438
"Instinct Theory and the German Reaction to Weismannism," John C. Burnham, 321–326
Ionic dissociation theory of Arrhenius, 218

Jaquet, A., on hemoglobin, 208–209, 212
Jean, Sir James, 168
Johanssen, on variability, 410, 412
"John Locke, John Ray, and the Problem of the Natural System," Phillip R. Sloan, 1–53

Kendrew, J., 186
Keynes, Geoffrey: on William Harvey, 189, 201–204; *The Life of William Harvey*, 201
Kirby, W., on parasitic worm origins, 102–103
Kohler, Robert E., "The Reception of Eduard Buchner's Discovery of Cell-Free Fermentation," 327–353
Kolliker, Albert von, 305–306
Krogh, August, on blood and hemoglobin, 219–228
Küchenmeister, Friedrich, 98; on spontaneous generation, 120–121
Kupffer, Carl, 330–331

Lacépède, 429–430
Lamarck, J. B.: on natural system, 4; on natural history of plants, 7; *Philosophie zoologique*, 56–58, 60, 63, 70, 74–79, 84, 87, 417–418, 429; on environment, 57–58; on volition, 58–59; evolutionism of, 59–61; on spontaneous generation, 70–72; on ascending scale and degradation, 74–79; on anti-essentialism, 80; conceptual framework, 80–81; on uniformitarianism, 80–81; on plenitude, continuity and gradualness, 81–82; minor contributions, 86–90; the verdict on, 90–92; Charles C. Gillispie on, 416–417; *Recherches sur l'organisation des corps vivans*, 417, 427; *Histoire naturelle des animaux san vertèbres*, 417–418, 436; *Mémoires de la Société d'Histoire naturelle de Paris*, 418; Faujas on, 419, 423–424; Henri Daudin on, 419, 434; Camille Limoges on, 422; *Systême des animaux sans vertèbres*, 423–424, 428

"Lamarck Revisited," Ernst Mayr, 55–94
Lamarckism, pseudo-Lamarckism, 57–59
Lange, Frederick, on spontaneous generation, 310–311
Lange, H., 337
Laws: Henry's, 211, 214; Galton's Ancestral Law of Heredity, 389, 403
Leibniz, 80
Leydig, 287
Liebig, Justus von, on spontaneous generation, 317–318
Life of William Harvey, The, Geoffrey Keynes, 201
Limoges, Camille, on Lamarck, 422
Linnaeus, C., 8; *Philosophica botanica*, 2, 5; on natural system, 5–6
Locke, John, *Essay Concerning Human Understanding*, 21, 26–27
Loeb, Jacques, 341; mechanism of, 171–172
Loew, Oscar, 346–347
Lones, T. E., on Aristotle's views of the heart, 357, 363, 366
Lovejoy, A. O., 81; *The Great Chain of Being*, 80; on Robert Chambers, 128–129
Lucas, Prosper, 395–396
Ludwig, Carl, 219, 227
Luria, Salvador, 187

Macfadyen, Allen, theory of fermentation, 343–344
Magnus, Gustav, on blood, 211–212
Malebranche, Nicolas de, on parasitic worm origins, 99
Man and his evolution, 89–90
Manchot, W., on hemoglobin, 234
Martin, Charles J., 237, 336
Materials for the Study of Variation, William Bateson, 406
Maxwell, Clerk, on spontaneous generation, 295
Mayr, Ernst, "Lamarck Revisited," 55–94
Mechanism: –vitalism controversy, 159–188; of Jacques Loeb, 171–172; of C. D. Broad, 174; of James D. Watson, 175
Meldrum, 256
Mémoires de la Société d'Histoire naturelle de Paris, J. B. Lamarck, 418
Metabolism: Pfluger's theory of intracellular metabolism, 344; Hofmeister's biochemical enzyme theory of, 346
Metchnikoff, Elie, 340
Methodus plantarum nova, John Ray, 8
Meynert, Theodor, 324
Mill, J. S., on abiogenesis, 290–291
Miller, S. L., 180
"Models for Cardiac Structure and Function in Aristotle," James Rochester Shaw, 355–388
Molécules organiques, 263–265
Moleschott, Jacob, 306
Monod, Jacques, and Ernest Borek, *Of Microbes and Life*, review, 443
Monographie der Moneren, Ernst Haeckel, 313
Morgan, C. Lloyd, 321–322
Mosaic evolution, 87–88
Moseley, Henry, on spontaneous generation, 300–301
Moule intérieur, 263–265
Müller, Johannes, 308–309; on spontaneous generation, 113, 116
Mutations, De Vries on, 405–406, 410, 412

Nagel, 227
Nägeli, Carl von, 309
Nasse, Hermann, on blood, 216–217
Natural Inheritance, Francis Galton, 389
Natural system, 1–53; Darwin on, 2–3; Lamarck on, 4; Cesalpino on, 11–15
Natürliche Schöpfungsgeschichte, Ernst Haeckel, 292, 313
Nebular hypothesis, 139–140
Neumeister, Richard, 341–342
Nichols, J. B., on hemoglobin, 244–245

Of Microbes and Life, Jacques Monod and Ernest Borek, review, 443
Ogel, W., 368–369; on Aristotle's cardiac structure, 375–377, 379–380
Oparin, A. I., on origin of life, 180
Orbeli, L., 233
Order: in Life, Edmund Samuel, review, 439–440
Origin of species, 63–68

Origins of Forms and Qualities According to the Corpuscular Philosophy, Robert Boyle, 15
Ostwald, Wolfgang, on hemoglobin, 234
Oxygen: uptake and release in blood, 211–215; binding of, 229–235; in hemoglobin molecule, 247–257
Oxygen dissociation curve: of hemoglobin, 231–232; J. S. Haldane on, 235–236; chemical basis of, 235–247
Oxyhemoglobin, spectroscopy of, 209–211

Pagel, Walter, on William Harvey, 189, 195–198, 199–201
Pangenesis, 398
Parasitic worm origins, 95–125; Johann Goeze on, 98–99; Marcus E. Bloch on, 98–99, 106–107; (1700–1840), 98–112; Descartes and, 99; Malebranche on, 99; Nicolas Andry on, 100; G. de Gols on, 100–102; W. Kirby on, 102–103; Herman Boerhaave on, 104; Buffon on, 104–105; Charles Bonnet on, 105–106; The German School, 106–112; Karl Rudolphi on, 107–108; Johann Bremser on, 108–110; Allen Thomson on, 112
Parsons, T. R., on hemoglobin, 251–252
Parts of Animals, Aristotle, 11, 355–356, 358, 371–372, 379–380, 383–386
Peck, A. L., 368–369
Peters, R. A., on hemoglobin, 213
Pfeffer, Wilhelm, on zymase, 340–341
Pflüger, Eduard, 218; theory of intracellular metabolism, 344
Philosophica botanica, C. Linnaeus, 2, 5
Philosophie zoologique, J. B. Lamarck, 56–58, 60, 63, 70, 74–79, 84, 87, 417–418, 429
Plants: Ray's division of herbaceous, 30–31; Rivinus' primary division of, 33; Tournefort's classification of, 39–42
Platt, A., on Aristotle's views on the heart, 357, 374, 379
Plenitude, 81–82
Pouchet, Felix, on spontaneous generation, 124–125
Poulton, E. B., 400
Preyer, W., 318; on hemoglobin, 207
Priestley, J. G., 248
Principles, Darwin's, 89
Principles of Biology, Herbert Spencer, 391
Principles of Human Physiology, E. H. Starling, 375–376
Protoplasm: vs. enzyme, 341–349; theory of Hans Abeles, 343; Augustin Wroblewski on, 344–346

Radiation, adaptive, 75–79
Ray, John: *Historia plantarum*, 8; *Methodus plantarum nova*, 8; division of herbaceous plants, 30–31; *De Variis*, 47
"Reception of Eduard Buchner's Discovery of Cell-Free Fermentation, The," Robert E. Kohler, 327–353
Recherches sur l'organisation des corps vivans, J. B. Lamarck, 417, 427
Reid, E. W., 237–238
Respiratory Function of the Blood, The, Joseph Barcroft, 231
Rivinus, 32–38; division of plants, 33
Roaf, H. E., on hemoglobin, 238
Roberts, Ff., 232
Rollett, A., 211
Romanes, G. J., 400
Roughton, F. J. W., 226, 232, 247, 256
Roux, Emile, on zymase, 339–340
Rudolphi, Karl, on parasitic worm origins, 107–108

Samuel, Edmund, *Order: in Life*, review, 439–440
Sceptical Chymist, Robert Boyle, 15
Schrödinger, Erwin, *What Is Life?*, 168–169
Schultze, 287
Scott, N. D., on hemoglobin, 235
Shaw, James Rochester, "Models for Cardiac Structure and Function in Aristotle," 355–388
Sinnot, Edmund, 175
Sloan, Phillip R., "John Locke, John Ray and the Problem of the Natural System," 1–53

Sørensen, S. P. L., 233
Source Book in Animal Biology, A, Thomas S. Hall, review, 439–440
Species, 63–68
Species, Buffon's concept of, 259–284; first statement, 260–263; elaboration, 265–268; expansion, 268–272; interim, 272–275; synthesis, 275–278; application and elaboration, 278–282; significance of, 282–284
Spencer, Herbert: on spontaneous generation, 300–301; *Principles of Biology,* 391; on inheritance, 399; on heredity, 410
Spontaneous generation, 71–72; (1700–1860), 95–125; rejection of doctrine of, 112–125; reaction against, 113–117; Rudolf Virchow on, 115–116, 314–317; Christian Ehrenberg on, 116–117; Johann Streenstrup on, 117–119, 121–122; Carl Theodor van Sielbold on, 117–123; new explanatory model, 117–125; M. Felix Dujardin on, 119–121; Friedrich Küchenmeister on, 120–121; P–J. Van Beneden on, 121–122; Felix Pouchet on, 124–125; (1859–1880), 285–319; T. H. Huxley on, 288, 298–299; Henry Bastian on, 293–294; Reverend Thomas Stebbing on, 294; Clerk Maxwell on, 295; Charles Darwin on, 297–299; John Tyndall on, 299–300; Henry Moseley on, 300–301; Herbert Spencer on, 300–301; William Thiselton-Dyer on, 300–301; William Carpenter on, 301–302; Ludwig Büchner on, 304; Heinrich Bronn on, 305; Albert von Kölliker on, 305–306; August Weismann on, 310; Frederick Lange on, 310–311; Justus von Liebig on, 317–318
"Spontaneous Generation Controversy (1700–1860): The Origin of Parasitic Worms, The," John Farley, 95–125
"Spontaneous Generation Controversy (1859–1880): British and German Reactions to the Problem of Abiogenesis, The," John Farley, 285–319
Stahl, G. E., on vitalism, 166
Starling, E. H., *Principles of Human Physiology,* 375–376
Stavenhagen, Alfred, 334
Stebbing, Reverend Thomas, on spontaneous generation, 294
Stent, Gunther, 187–188
Stewart, Dugald, 437
Stokes, George Gabriel, 209–210
Streenstrup, Johann, on spontaneous generation, 117–119, 121–122
Svedberg, T., on hemoglobin, 243–245
Systême des animaux sans vertèbres, J. B. Lamarck, 423–424, 428

Taxa, sharp delimination of, 82–84
Teichmann, Z., 207
Thermodynamic treatise of Willard Gibbs, 243
Thiselton-Dyer, William, on spontaneous generation, 300–301
Thompson, D'Arcy, 374
Thomson, Allen, on parasitic worm origins, 112
Thomson, J. A., on heredity, 406
Tournefort, Joseph Pitton, 5; classification of plants, 39–42
Tracy, T. J., 357, 374
Treatise on Verminous Diseases, A, V. L. Brera, 111
Tyndall, John, 287; on abiogenesis, 289–290; on spontaneous generation, 299–300

Ueber die Erhaltung der Kraft, Hermann von Helmholtz, 286
Uniformitarianism, Lamarack's, 80–81
"Universal Gestation of Nature: Chambers' *Vestiges* and *Explanations,* The," M. J. S. Hodge, 127–151

Vallisneri, Antonio, 101–102
Van Beneden, P–J., on spontaneous generation, 121–122
Van Slyke, D. D., 253, 256
van't Hoff, 236
Variability, Johannsen on, 410, 412
Variation: Prosper Lucas on, 395–396; Darwin on, 396–397; William Bateson on, 407, 410, 412
Vestiges of the Natural History of Creation, Robert Chambers, 127–151

Virchow, Rudolf, 115–116, 314–317
Vitalism: –mechanism controversy, 159–188; G. E. Stahl on, 166; Bichât on, 166–168; Claude Bernard on, 167–168; Hans Driesch on, 170–172; Paul Weiss, on, 173; Francis Crick on, 176
Voit, Carl, 329–331
Volition, Lamarck on, 58–59
von Limbeck, R., on blood, 217
Von Siebold, Carl Theodor, on spontaneous generation, 117–123

Walker, Alexander, 401
Wallace, Alfred, 296
"Wallace, Darwin, and Edward Blyth: Further Notes on the Development of Evolution Theory," Barbara G. Beddall, 153–158
Watson, James D., mechanism of, 175
Wehmer, Carl, 335–336
Weismann, August, 310, 321–326, 400
Weiss, Paul: on vitalism, 173; "The Cell as a Unit," 181; *Bio-medical Excursions. A Biologist's Probings into Medicine,* review, 443–444; *Within the Gates of Science and Beyond. Science in its Cultural Commitments,* review, 443–444
Werigo, B., 227–228
What is Life?, Erwin Schrödinger, 168–169
Whewell, William, 139, 291
Whitteridge, Gweneth, *William Harvey and the Circulation of the Blood,* 189–204
Wilkins, John, *Essay Toward a Real Character and a Philosophical Language,* 27–28
Will, Heinrich, 333
William Harvey and the Circulation of the Blood, Gweneth Whitteridge, 189–204
Wilson, Leonard G., on cardiac structure, 375–376
Within the Gates of Science and Beyond. Science in its Cultural Commitments, Paul A. Weiss, review, 443–444
Woolridge, Dean E., 175
Worms, *see* Parasitic worm origins
Wroblewski, Augustin, on protoplasm, 344–346
Wyman, J., 255–256

Ziegler, Heinrich Ernst, 323–326
Zinoffsky, O., 208–209, 212
Zuntz, Nathan, on blood, 215–216, 218, 227
Zymase, 328–333; Joseph Reynolds Green on, 333–334, 337; Emile Duclaux on, 338–339; early support for, 338–341; Emile Roux on, 339–340; Wilhelm Pfeffer on, 340–341; Hugo Fischer on, 348–349
